# Problem

- We need a way to collect signatures from users so they don't have to resign their forms every time a new HIPAA form needs to be prepared

**Warning:** do not forward this email to others or else they will be able to access your document.

---

**What is HelloSign?**

HelloSign is the easiest way to sign and send documents online. Instead of printing, signing and scanning, the document signing process is completed on the web.

# How We're Currently Doing It

# Requirements

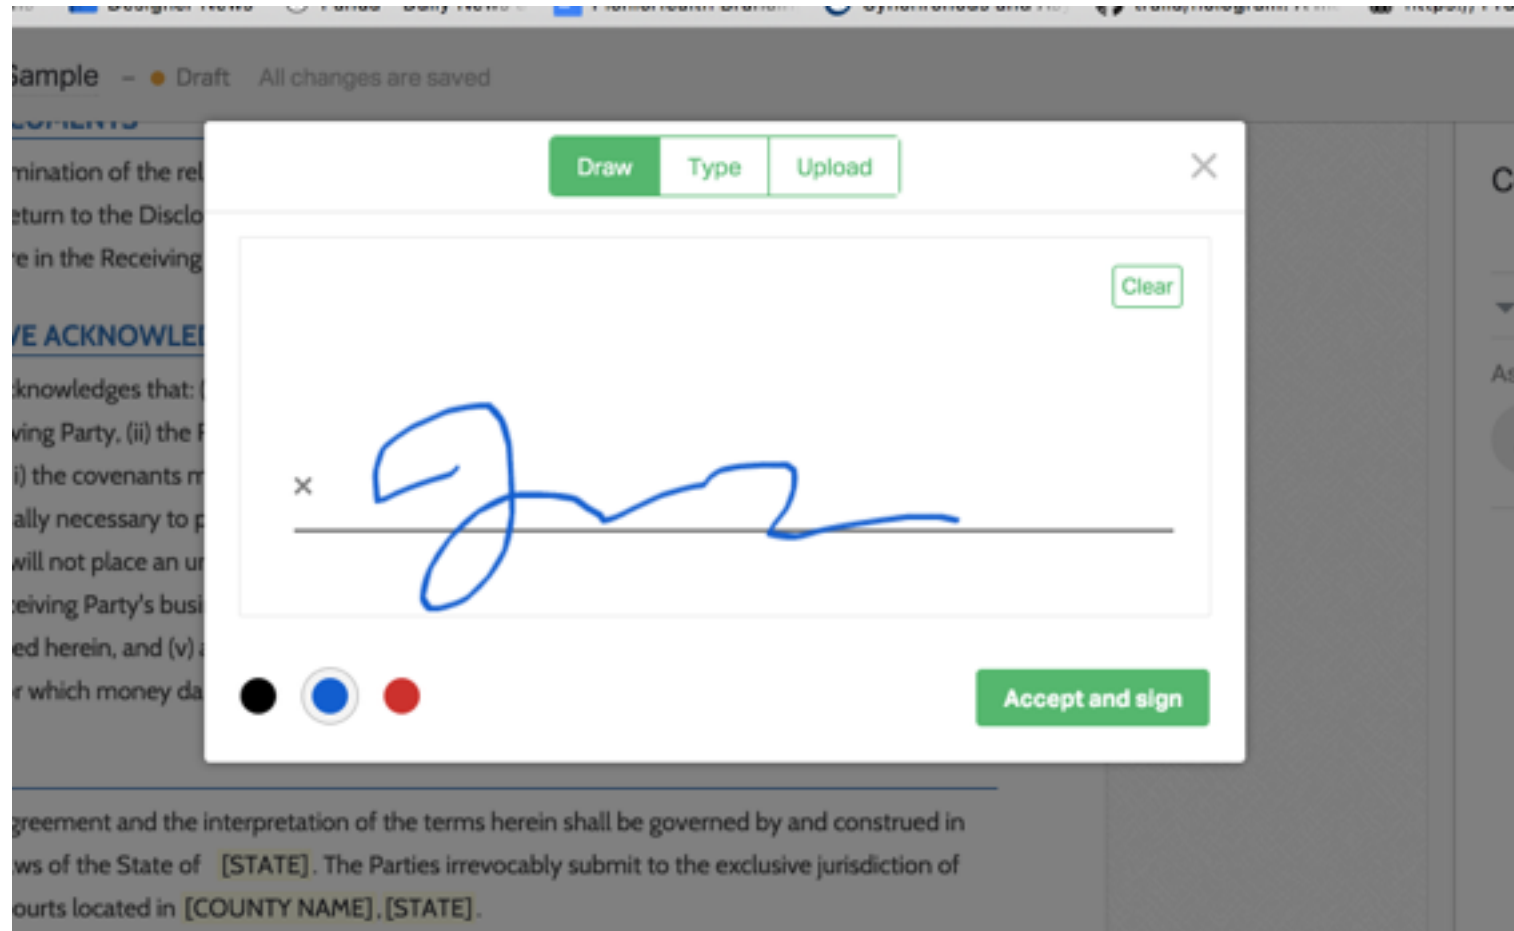

- Multiple means of signing forms (ie. Not everyone has access to a webcam or a trackpad or a smartphone)
- Easy to use with limited computer skills
- Like really limited computer skills
- Way to resign
- We have to receive something we'd be able to paste into PDF forms

Adobe Acrobat PDF Files

Adobe Acrobat PDF Files is a universal file format that preserves all of the text, images, and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- *Anyone, anywhere* can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files *always print correctly* on any printing device.
- PDF files always display *exactly* as created, regardless of fonts, software, and operating systems. Fonts, and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.
